

FUEL FIT®

Briggs & Stratton Fuel Fit® additive is for use in all 4-stroke and 2-stroke engines. Modern fuels attract moisture that can corrode engines. Fuel Fit® works to prevent this and provides an internal coating to protect engine parts. It contains detergents to avoid the build up of dirt, promoting durable, efficient performance and stabilises fuel for up to 3 years to ensure easy starting. Available in 100ml and 250ml sizes for dosing varying fuel quantities, with an instore CDU for easy impactful merchandising.
