ENGINES

TRANSMISSIONS

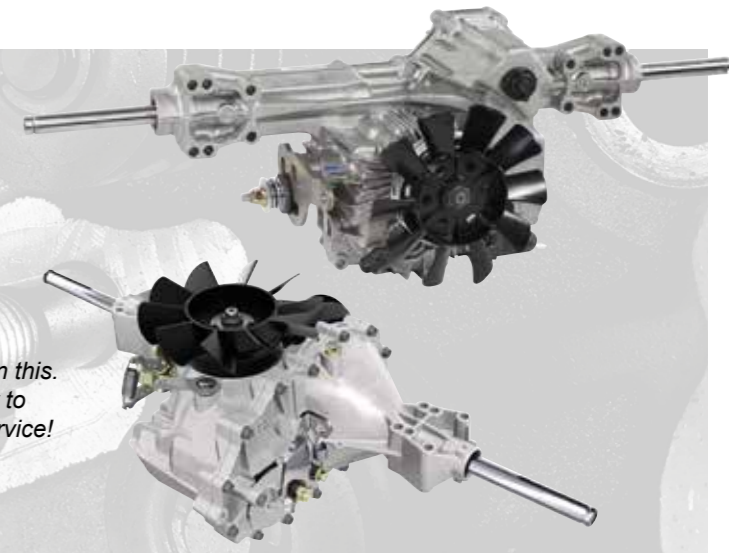

Wow... after calling a few places trying to track down a couple of engine parts with limited info' Claire could not have been more helpful. Amazing service and through process of elimination we found exactly what was needed when no one else could. Spent a good 10 minutes on the phone with us. Not had a customer experience like that anywhere of late. Absolutely spot on!!!

James Gordon
Satisfied Customer

Thank you for getting back to me so quickly on this. I have to say that UEP are a brilliant company to deal with and I'm really impressed with the service!

SNAPPER

Picked up the replacement starter while in UK and fitted it this a.m. and all good. But the main reason I wanted to write was to say that I am immensely impressed with your organisation, everyone I have spoken to on the phone, or met when I was there on Tuesday have been, cheerful, willing to help, knowledgeable and it is a pleasure in this day and age to encounter this.

I will certainly sing your praises, not to mention your good prices.

James Pyper
Satisfied Customer

Over the last two years both Richard and I have placed business towards each other. Some has been warranty and on a few occasions this has been done as chargeable. I have found you very helpful in supporting our customers. Credit you your team!

About Us

uni-power was established in 1986 by Ray Brown, a former employee of Autocar (The original Briggs & Stratton UK Distributor), he saw a gap in the market for a Specialist Engine, Transmission & Parts Distributor to serve the Industrial Trade & Original Equipment Manufacturer sector.

Since 1986 the business model has not altered, we do not sell end products, which would place us in direct competition with our customers.

Via our dedicated Service Division with field support vehicles, we offer full Trade/OEM Service & Warranty support, including 3rd Party Warranty for Direct OEM Machine Dealers.

We have an extensive company website with protected trade account login, parts catalogues, webcart & live stock availability.

Our extensive stocking procedure is monitored on a daily basis, resulting in popular Engines, Transmissions & Spare Parts being readily available when you need them!
